ABSTRACT
This report presents highlights of the National Assessment of Educational Progress 2003 reading assessment. It describes assessment content and presents assessment results as average scale scores and as percentages of students scoring at or above achievement levels, at grades 4 and 8 , for the nation and participating states and jurisdictions. It also presents performance results for selected subgroups of the samples. Major findings are: (1) no significant change was detected between 2002 and 2003 in the average score for fourth-graders; (2) the average fourth-grade score in 2003 was not found to differ significantly from that in 1992; (3) the average reading score for eighth-graders decreased by one point between 2002 and 2003; however, (4) the score in 2003 was higher than that in 1992. Sample reading assessment questions and responses, technical notes, and additional data tables are attached. (RS)

The Nation's Report Card: Reading Highlights, 2003.
U.S. DEPARTMENT OF EDUCATION EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)
CENTER (ERIC) received from the person or organization originating it.

- Minor changes have been made to improve reproduction quality.
- Points of view or opinions stated in this document do not necessarily represent document do not necessarily rep
official OERI position or poticy.

Since 1969 the National Assessment of Educational Progress (NAEP) has been an ongoing nationally representative indicator of what American students know and can do in major academic subjects.

Over the years, NAEP has measured students' achievement in many subjects, including reading, mathematics, science, writing, U.S. history, geography, civics, and the arts. In 2003, NAEP conducted a national and state assessment in reading at grades 4 and 8.

NAEP is a project of the National Center for Education Statistics (NCES) within the Institute of Education Sciences of the U.S. Department of Education, and is overseen by the National Assessment Governing Board (NAGB).

## The Nation's Report Card

# Average Fourth- and Eighth-Grade Reading Scores Show Little Change 

No significant change was detected between 2002 and 2003 in the average score for fourthgraders. The average fourth-grade score in 2003 was not found to differ significantly from that in 1992. The average reading score for eighth-graders decreased by 1 point between 2002 and 2003; however, the score in 2003 was higher than that in 1992. (Differences are discussed in this report only if they were found to be statistically significant.)

- Significantly different from 2003.

NOTE: Average reading scores are reported on a $0-500$ scale. Oata were not collected at grade 8 in 2000 . In addition to allowing for accommodations. the accommodations-pemitted results at grade 4 (1998-2003) differ slighty from previous years' resuits, and from previously reported results for 1998 and 2000, due to changes in sample weighting procedures. Significance tesis were performed using unrounded numbers. SOURCE: U.S. Department of Education, Anstitute of Education Sciences, National Center for Educatior Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998. 2000, 2002, and 2003 Reading Assessments.

## How well did students perform in 2003?

The figures to the right show that 31 percent of fourth-graders and 32 percent of eighthgraders performed at or above the Proficient level in 2003. The percentage of students performing at or above the Baisic level in 2003 was 63 percent at grade 4 and 74 percent at grade 8 .
NOTE: Detail may not sum to totals because of rounding.

Progyess (NAEP), 2003 Reading Assessment.

## Background Information

Average test scores have a standard error-a range of up to a few points above or below the score-due to sampling error and measurement error Statistical tests are used to determine whether the differences between average scores are significant; therefore, not all apparent differences may be found to be statistically signiticant. All the differences discussed in this report were tested for stacistical significance at the . 05 level.
Beginning in 2002, the NAEP national sample was obtained by aggregating the samples from each state, rather than by obtaining an independently selected national sample. As a
consequence, the size of the national sample increased, and smaller differences beween years or between types of students were found to be statistically significant than would have been detected in previous assessments. In keeping with past. practice, all statistically significant differences are indicated in the current report.
The results presented in the figures and rables throughout this report distinguish between two different reporting samples that reflect a change in administration procedures. The more recent results are based on administration procedures in
which testing accommodations (e.g., extended time, small group testing) were permitted for students with disabilities and limited-English-proficient students. Accommodations were not permitted in 1992 or 1994. Comparisons between results from 2003 and those from assessment years in which both types of administration procedures were used (in 1998 and 2000 at grade 4 and in 1998 at grade 8) are discussed based on the results when accommodations were permitted, even though significant differences in results when accommodations were not permitted may be noted in the figures and tables.

## The Nation's Report Card

## Achievement Levels Provide Standards for Student Performance

Achievement levels are performance standards set by NAGB to provide a context for interpreting student performance on NAEP. These performance standards, based on recommendations from broadly representative panels of educators and members of the public, are used to report what students should know and be able to do at the Basic, Proficient, and Advanced levels of performance in each subject area and at each grade assessed.
Detailed descriptions of the NAEP reading achievement levels can be found on the NAGB web site (http:// www.nagb.org/pubs/ pubs.html).

The minimum scate scores for achievement levels are as follows:

|  | Grade |  |
| :--- | :---: | :---: |
|  | Grade |  |
| Basic | $\frac{4}{208}$ | $\frac{8}{243}$ |
| Proficient | 238 | 281 |
| Advanced | 268 | 323 |

As provided by law, NCES, upon review of a congressionally mandated evahuation of NAEP, has determined that achievement levels are to be used on a trial basis and should be interpreted and used with caution.
However, both NCES and NAGB believe that these performance standards are useful for understanding trends in student achievement. NAEP achievement levels have been widely used by national and state officials.

## Higher Percentages of Fourth- and EighthGraders Performed at or Above Proficient in 2003 Compared to 1992

The percentages of students performing at or above the Proficient level were higher in 2003 than in 1992 at both grades 4 and 8 . No significant change was detected in the percentage of fourth-graders at or above Basic from 2002 to 2003, and the percentage of fourth-graders at or above Basic in 2003 was not found to differ significantly from that in 1992. The percentage of eighth-graders at or above Basic decreased by 1 point between 2002 and 2003, but was higher in 2003 than in 1992.
Percentages of students, by reading achievement level, grades 4 and 8: 1992-2003

| $\square$ |  | Below Basle | At or above Basic | At or above |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

*Significantly different from 2003.
NOTE: Oetail may not sum to totais because of rounding. Oata were not collected at grade 8 in 2000 . In addition to allowing for accommodations, the accommodationspermitted results at grade 4 (1998-2003) differ slightly from previous years' results, and from previously reported results for 1998 and 2000, due to changes in sample weighting procedures. Significance tests were periormed using unrounded numbers.
SOURCE: U.S. Oepartment of Education, Institute of Education Sciences, National Centar for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2000, 2002, and 2003 Reading Assessments.

Percentages of students at or above Basic and Proficient in reading, grades 4 and 8: 1992-2003 80

*Significantly different from 2003.
NOTE: Oata were not collected at grade 8 in 2000 . In addition to allowing for accommodations, the accommodations-pernitted results at grade 4 (1998-2003) differ slightly from pravious years' results, and from previously reported results for 1998 and 2000 , due to changes in sample weighting procedures. Significance tests were performed using unrounded numbers.
SOURCE: U.S Oepartment of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progess (NAEP), 1992, 1994, 1998, 2000, 2002, and 2003 Reading Assessments.

## Achievement Levels <br> , 3 ,

Basic: This level denotes partial nitistery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.
Proficient: This level represents solid academic performance for each grade assessed. Students reaching this level have dêmonstrated competency over challenging subject ${ }^{2}$ mater, including subjectnaterknowledge, applicaton of such knowledge to real-world, situations, and analytical skills approprite to the subject mater.
Advanced: This level signifies superior performance.

## Trends in Percentiles Differ by Grade Level

Looking at changes in scores for students at lower-, middle-, and higher-performance levels gives a more complete picture of student progress. An examination of scores at different percentiles on the $0-500$ reading
scale at each grade indicates whether or not the changes seen in the national average score results are reflected in the performance of lower-middle-, and higher-performing students.

The percentile indicates the percentage of students whose scores fell below a particular score. For example, 25 percent of assessed students' scores fell below the 25 th percentile score and 75 percent fell below the 75th percentile score.

Reading scale score percentiles, grades 4 and 8: 1992-2003

## NAEP 2003 Reading Assessment Design

## Assessment Framework

The NAEP reading framework, which clefines the content for the 1992-2003 assessments, was developed through a comprehensive national consultative process and adopted by NAGB.

The reading framework is organized along two dimensions, the contexl for reading and the aspect of reading. The context dimension is divided into three areas that characterize the purposes for reading: reading for literary experience, reading for information, and reading to perform a task. All three contexts are assessed at grade 8, but reading to perform a task is not assessed at grade 4 The aspects of reading,
which define the types of comprehension questions used in the assessments, include forming a general understanding, developing interpretation, making reader/text connections, and examining content and structure. Each student read one or two passages and responded to approximately 10 questions in 25 minutes. The sample questions on pages 16-19 illustrate how the assessment measures the contexts and aspects of reading described in the NAEP reading framework.

The complete framework is available on the NAGB web site (http://www.nagb.org/ pubs/pubs.html).

## Student Samples

Results from the 2003 reading assessment are reported for the nation and
states at grades 4 and 8 . The national results are based on a representative sample of students in both public schools and nonpublic schools, while the state results are based only on public-school students.

## Accommodations

It is NAEP's intent to assess all selected students from the target population. Before 1998, no testing accommodations were provided to students with disabilities and limited-English-proficient students who participated in the NAEP reading assessments. In 1998 and 2000 (at fourth grade only), NAEP was administered to two reporting samples-"accommodations not permitted" and "accommodations

There was a 1 point increase in the fourth-grade reading score at the 90 th percentile between 2002 and 2003, and the score in 2003 was not found to be significantly different from that in 1992. The score at the 75th percentile for fourth-graders showed no significant change since 2002 , but was higher in 2003 than in 1992.

There were decreases in eighth-grade scores at the 10 th and 25 th percentiles from 2002 to 2003. Scores at the $10 \mathrm{th}, 25 \mathrm{th}, 50 \mathrm{th}$, and 75 th percentiles were higher in 2003 than in 1992.
$\mathrm{O}=\mathrm{=O}$ Accommodalians nol permilted
$\square$ Actommodolions permitted
*Significantly different from 2003.
NUTE: Oata were not collected at grade 8 in 2000. In addition to allowing for accommodations, the accommodations-permitted results at grade 4 (19982003) differ stightly fom previous pears' resutts, and from previously reported results for 1998 and 2000 , due to changes in sample weighting procedures. Significance tests were pertormed using unrounded numbers.
SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progess (NAEP), 1992, 1994, 1998, 2000, 2002. and 2003 Reading Assessments.
permitted." Beginning in 2002, the NAEP reading assessment adopted the new "accommodations permitted" procedure as its only administration procedure, and thus had only one reporting sample as in reading assessinent years prior to 1998.

Because the representativeness of samples is ultimately a validity issue, NCES has commissioned studies of the impact of assessment accommodations on overall scores. One paper that explores the impact of two possible scenarios on NAEP is available on the NAEP web site (http:// www.nces.ed.gov/ nationsreportcard/pdf/ main2002/statmeth.pdf).

## How States Performed in Reading

In addition to national results, the 2003 reading assessment collected performance data for fourth- and eighth-graders who attended public schools in states and other jurisdictions that participated. In 2003, all 50
states and 3 other jurisdictions participated at grades 4 and 8.

## State Average Score Results

Tables 1 and 2 present average reading score
results for fourth- and eighth-graders, respectively. Among the 46 states and jurisdictions that participated in both the 2002 and 2003 fourth-grade assessments, 1 showed an increase in the average reading score
and 1 showed a decrease. Of the 42 states and jurisdictions that participated in both the 1992 and 2003 fourth-grade assessments, 13 showed increases and 5 showed declines in average scores.

## The Nation's Report Card

## State vs. Nation Comparisons

Figures 1 and 2 show how the performance of students in participating states and jurisdictions compares to the performance of students in the national public-school sample.

In 2003, 28 of the 53 states and other jurisdictions that participated at grade 4 had average scores that were higher than the national average, 11 had scores that were not found to differ significantly from the national average, and 14
had average scores that were lower than the average score for the nation.
Of the 53 states and other jurisdictions that participated in 2003 at grade 8, 31 had average scores that were higher than the national
average, 6 had average scores that were not found to differ significantly from the national average, and 16 had average scores that were lower than the national average score.

## 

Statefjurisdiction had higher average scate score than nation.
Statef)urisdiction was not found to be slignificantly different from nation in avarage scale score.
Statefjurisdiction had lower average scale score than nation.

[^0]
## State Achievement-Level Results

The figures on this and the next page show the percentages of fourth- and eighthgraders at each achievement level for the states and jurisdictions that participated in the 2003 reading
assessment. In both figures, the shaded bars represent the proportion of students at each of three achievement levels-Basic, Proficient, and Advanced-as well as the proportion below Basic. The central vertical line divides the proportion of students
who fell below the Proficien level (i.e., at Basic or below Basic) from those who performed at or above the Proficient achievement level (i.e., at Proficient or at Advanced). Scanning down the horizontal bars to the right of the vertical line
allows easy comparison of states' and other jurisdictions' percentages of students at or above Proficient-the achievement level identified by the National Assessment Governing Board as the standard all students should reach. States and other

## The Nation's Report Card

jurisdictions are listed alphabetically within three groups: percentage at or above Proficient was higher than, not significantly different from, or lower than the nation.

At grade 4, as shown in figure 3, 24 states and other jurisdictions had higher percentages of students at or above Proficient than the nation, 16 had percentages that were not found to be
statistically different from the nation, and 13 had percentages that were lower than the nation.
At grade 8, as shown in figure 4, 25 states and other jurisdictions had higher
percentages of students at or above Proficient than the nation, 11 had percentages that were not found to be significantly different from the nation, and 17 had percentages that were lower: than the nation.

[^1]
## Percentage of Students at or Above Proficient Across Years by State

The percentage of students at or above the Proficient level across years is presented in table 3 for grade 4 and in table 4 for grade 8.

Of the 46 states and other jurisdictions that participated in both the 2002 and 2003 fourth-grade reading assessments, 1 showed an increase and 1 showed a
decrease in the percentage of students at or above Proficient. The percentage of fourth-graders at or above Proficient increased in 17 of the 42 states and jurisdic-
tions that participated in both the 1992 and 2003 assessments, and none showed a decline since 1992.

## The Nation's Report Card

Of the 44 states and jurisdictions that participated in the 2002 and 2003 eighth-grade reading assessments, 1
showed declines in the percentage of students at or above Proficient. Between 1998 (when accommoda-
tions were permitted) and 2003, the percentage of eighth-graders performing at or above Proficienl in-
creased in 5 of the 39 states and jurisdictions that participated in both years, and 1 showed a decline. showed an increase and 2

## How Various Groups of Students Performed in Reading

In addition to reporting on overall students' performance on its assessments, NAEP also reports on the performance of various subgroups of students. The reading performance of
subgroups of students in 2003 indicates whether they have progressed since earlier assessments and allows for comparisons with the performance of other subgroups in 2003.

When reading these subgroup results, it is important to keep in mind that there is no simple, cause-andeffect relationship between membership in a subgroup and achievement in NAEP.

A complex mix of educational and socioeconomic factors may interact to affect student performance.
score in 2003 was higher than in 1992. The average score for female eighthgraders in 2003 was not found to differ significantly from the scores in any of the previous assessment years.

Female students scored higher on average than male students at both grades 4 and 8.

## Average Reading Scores by Gender

No statistically significant changes were detected in average scores of male or
female fourth-graders between 2002 and 2003, or between 1992 and 2003 .

The average reading score for male eighth-graders declined 2 points between 2002 and 2003; the average

The figures below present average reading scores for males and females across assessment years.

Average reading scale scores, by gender, grades 4 and 8: 1992-2003

## Average Reading Score Gaps Between Males and Females

In 2003, female students scored higher on average than male students by 7 points at grade 4 and by 11 points at grade 8 . No statistically significant change was detected in the gender gaps between 2002 and 2003, and the fourth- and eighth-grade gaps observed in 2003 were not found to be significantly different from those in 1992.

[^2]acomod Accommodotions not permitted $\square \square$ Accommodotions permitited

- Significantly different from 2003.

NOTE: Data were not collected at grade 8 in 2000. Female

## Achievement-Level Results by Gender

The percentages of male and female students at or above the Basic and Proficient reading achievement levels are presented below.

At grade 4, no significant change was detected from 2002 to 2003 in the percent-
ages of male or female students performing at or above the Basic and Proficient levels, and the percentages in 2003 were not found to differ significantly from those in 1992 for either subgroup.

At grade 8, the percentage of male students at or above Proficient was higher in 2003 than in 1992. There was no significant difference detected in the percentage of female eighth-graders at or above Proficient in 2003 in
comparison to any of the previous assessments. The percentages of both male and female students at or above Basic declined from 2002 to 2003, but both percentages were higher in 2003 than in 1992.

Percentages of students at or above Basic and Proficient in reading, by gender, grades 4 and 8: 1992-2003
Male

- Significandy different from 2003.

NOTE Deta were not collected at gade 8 in 2000. In addition to allowing for accommodations, the accommodations-permitted results at grade 4 (1998-2003) differ slighty from previous years' results, and from previously reported results for 1998 and 2000, due to changes in sample welghting procedures. Significance tests were performed using unrounded numbers. source: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progess (NAEP), 1992, 1994, 1998, 2000, 2002, and 2003 Resding Assessments

## Average Reading Scores by Race/Ethnicity

Students who took the NAEP reading assessment were identified as belonging to one of the racial/ euhnic subgroups shown in the figures below or as "other" based on information obtained from school records. The results presented here for 1992 through 2000 differ from those presented in reading reports prior to 2002, in which results were reported for five racial/
ethnic subgroups based on student self-identification.

There were no significant changes detected since 2002 in the average scores for any of the racial/ethnic groups at either grade 4 or grade 8 . The average scores for White, Black, and Asian/ Pacific Islander fourthgraders were higher in 2003 than in 1992. The average scores for White, Black, and Hispanic eighth-graders
were also higher in 2003 than in 1992. The apparent decrease in the average score for American Indian/ Alaska Native students in 2003 was not found to be statistically significant at either grade 4 or grade 8 .
In 2003, White students and Asian/Pacific Islander students outperformed Black, Hispanic, and American Indian/Alaska Native students on average at both
grades 4 and 8. At grade 4, White students also scored higher on average than Asian/Pacific Islander students, and Hispanic students scored higher on average than Black students. There were no significant differences detected at grade 8 between the average scores for White and Asian/ Pacific Islander students or between the average scores for Hispanic and Black students.

Average reading scale scores, by race/ethnicity, grades 4 and 8: 1992-2003

- Siggificanty different from 2003.
${ }^{1}$ Sample size was insufficient to permit a reliable estimate for American Indian/Alaska Native students in 1992 and 1998 at grades 4 and 8
NOTE: At each gade, approximately 1 percent of students were classified as American Indlan/Alaska Native or "other" (not shown). Oata were not collected at gada 8 in 2000 . In addition to allowing for accommodations, the accommodations permitted results at grade 4 (1998-2003) differ slighty from previous years' results, and from previously reported results for 1998 and 2000 , due to changes in
sample weighting procedures. Significance tests were performed using unrounded numbers.
SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational PIogress (NAEP), 1992, 1994, 1998, 2000, 2002, and 2003 Reading Assessments.

## Average Reading Score Gaps Between Selected Racial/Ethnic Subgroups

Average score gaps across assessment years between White and Black students and between White and Hispanic students are presented in the figures shown to the right.
At both grades 4 and 8 , the average score gaps between White and Black students and between White and Hispanic students in 2003 were not found to differ significantly from those in 2002 or 1992.

## -Siggrificanty different from 2003.

NOTE: Data were not collected at grade 8 in 2000 . Score gaps are calculated based on differences between unrounded average scate scores. Significance tests were performed using unrounded numbers.

## The Nation's Report Card

## Achievement-Level Results by Race/Ethnicity

Achievement-level results for the racial/ethnic subgroups are presented in the figures below.

At both grades 4 and 8 , there were no significant changes detected in the percentages of students at or above the Basic and Proficient
levels within any of the racial/ethnic subgroups since 2002. At grade 4, the percentages of White, Black, and Asian/Pacific Islander students at or above Proficient were higher in 2003 than in 1992. Also, the percent-
ages of White and Black students at or above Basic were higher in 2003 compared to 1992. No significant changes were detected in the percentages of Hispanic students at or above Basic or Proficient in 2003 compared to 1992.

At grade 8, the percentages of White students and Black students at or above the Basic and Proficient levels were higher in 2003 than in 1992. A higher percentage of Hispanic students scored at or above Basic in 2003 than in 1992.

Percentages of students at or above Basic and Proficient in reading, by race/ethnicity, grades 4 and 8: 1992-2003

## Average Reading Scores by Students' Eligibility for Free/Reduced-Price School Lunch

NAEP collects data on students' eligibility for free/ reduced-price lunch as an indicator of family economic status. Eligibility for free and reduced-price lunches is determined by students' family income in relation to the federally established poverty level. Free lunch qualification is set at 130 percent of the poverty level, and reducedprice lunch qualification is set between 130 and 185 percent of the poverty level. Information regarding students' eligibility in 2003 was not available for 10 percent of fourth-graders and 11 percent of eighthgraders, either because their school did not participate in the National School Lunch Program or for other reasons.
At grade 4, average scores were higher in 2003 than in 1998 for students who were eligible for free/reducedprice lunch and for stuclents who were not eligible, but showed no significant
change between 2002 and 2003.
At grade 8, the average score for students who were eligible for free/reducedprice lunch showed a decrease between 2002 and 2003. Average scores in 2003 were not found to differ significantly from those in 1998 for students who were eligible for free/reducedprice lunch or for students who were not eligible.
Results broken down by students' eligibility for free lunch and eligibility for reduced-price lunch are available on the NAEP web site (http://nces.ed.gov/ nationsreportcard/ naepdata). The average reading scores for fourthand eighth-graders who were eligible for free lunch were lower than the scores for students who were eligible for reduced-price lunch, and both were lower than the scores for students who were not eligible.

## The Nation's Report Card

## Sample Reading Assessment Questions

The NAEP reading assessment measures students' comprehension of reading materials that are drawn from sources typical of those available to students inside and outside of school (e.g., children's magazines, informational books, and anthologies). Students who participate in the assessment read these texts and then answer comprehension questions about them. Some of the comprehension questions are formatted as multiple-choice questions and others are formatted as
constructed-response questions. With the constructedresponse questions, students are required to provide their own written answer to the question based on information from the reading passage.
Brief descriptions of texts for items used in the 2003 assessment and some of the comprehension questions that accompanied them are presented on this and the following pages to illustrate the content of the assessment. The complete texts
and the entire set of comprehension questions that accompanied each of these examples (along with additional released texts and questions from past assessments) are available on the NAEP web site (http:// nces.ed.gov/nationsreportcard/ itmrls).

The tables presented here with each sample question show the percentage of students who answered a multiple-choice question correctly or whose responses to a constructed-response
question were rated at or above a particular score level, first as the overall percentage and then as the percentage of students at each achievement level who answered successfully. For the multiple-choice questions shown, the oval corresponding to the correct response is filled in. For the constructed-response questions, sample student responses are presented. In addition, the reading context and reading aspect being assessed by each question are identified.

## Arece 9 Samplo question and Responses

nets by citing at least two pets by citing at least two wombat traits discussed In the passage and connecting one of the traits to a negative outcome that might occur If wombats were kept as pets, or by citing two negative outcomes, linking to a wombat trait.

Sample "Extensive" response
Give two reasons why people should not have wombats as pets. Use what you learned in the passage to support your answer.
Wombats would not make a good pet because they are wild. Tor this reason wombats are afraid of -people and if it got scared it could tear parts of your body up by using ito sharp claus-ivombats sleep in burrows up to fifteen feet deeps let could not sleep in a cage, plus wombats are only active at night the only thing it would do in sleep For the ar reasons womerats would mot make gook pets.

© He wanted to help Mrs. Jones prepare the food.
(1) He wanted to keep an eye on Mrs. Jones.

## Technical Notes <br> School and Student Samples

All 50 states and three jurisdictions participated and met the minimum guidelines for reporting their results in 2003. Approximately 188,000 fourth-graders from 7,500 schools and 155,000 eighth-graders from 6,100 schools were assessed in reading in 2003 . The national samples were larger in 2002 and 2003 than in previous assessment years because they were based on the combined sample of students assessed in each participating state, plus an additional sample from nonparticipating states and private schools. In 1992-2000 the national samples were drawn separately from the state samples and were smaller than the samples resulting from aggregating the state samples.
There has been a shift in the racial/ethnic composition of the student population and students participating in NAEP. The percentage of Hispanic students increased from 7 percent in 1992 to 17 percent in 2003 at grade 4, and from 8 percent to 15 percent at grade 8 . The percentage of

White students decreased from 73 percent in 1992 to 60 percent in 2003 at grade 4, and from 72 percent to 63 percent at grade 8. The percentage of Black students, which has changed less over the years, is approximately 17 percent at grade 4 and 16 percent at grade 8 .

Prior to 2003, results in NAEP were reported for four NAEP-defined regions of the nation: Northeast, Southeast, Central, and West. To align NAEP with other federal data collections, beginning in 2003 NAEP analysis and reports have used U.S. Census Bureau definitions of "region." The four Census-defined regions are: Northeast, South, Midwest and West. Figure A. 1 shows how states are subdivided into these census regions (the two Department of Defense Educational Activities jurisdictions are not assigned to any region). As a result of this change in the region variable, the following section presents the results by region of the country for the 2003 assessment only.

Limited-English-proficient students

## \#The estimate rounds to zero

$\ddagger$ Reporting standards not met Sample size is insufficient to permit a reliable estimate.
Departunent of Detense Domestic Dependent Elementary and Secondary Schools.
${ }^{2}$ Department of Defense Dependents Schools (Overseas).
NOTE: Detail may not sum to totals because of rounding. The results for students with disabilities and limited-Engish-proficient students are based an students who were assessed and cannot be generalized to the total population of such students. The weighted percentages of students with and without disabilities and limited Engish proficiency are based an the cotal number of students assessed unile the percentages excluded are based an the number of students sampled.

Department of Defense Domestic Dependent Elementary and Secondary Schools.
${ }^{2}$ Oepartnent of Oefense Oependents Schools (Overseas).
NOTE: Oetail may not sum to totats because of rounding. The results for students with disabitities and limited-English-proficient students are based on students who were assessed and cannot be generalized to the total population of such students. The weighted percentages of students with and without disabillties and limited English proficiency are based on the total number of students assessed while the percentages excluded are based on the number of students sampled.
